ENVIRONMENTAL AND SAFETY MANAGEMENT SYSTEM

Emission 2018/03/29

ODE

Revision -----

ODE S.r.l. is committed to maintaining and improving its current Integrated Environment and Safety Management System compliant to standards ISO 14001, BS OHSAS 18001 and ISO 45001, in consideration of fundamental principles of respect for the environment and safety in the workplace. The organization is fully aware that a responsible economic strategy aimed at environmental and safety issues in its activities is essential for business success and customer satisfaction. The company is committed to pursuing a policy of continuous improvement of its environmental and safety performance, minimizing, where technically and economically sustainable, any negative impact of its activities.

The top management declares a commitment by **ODE S.r.l.** to:

- ❖ Guarantee that its activities are carried out in compliance with applicable provisions of law;
- ❖ Dispose of necessary financial resources to improve environmental and work conditions;
- ❖ Manage business processes effectively and efficiently;
- ❖ Minimize the risks and environmental impacts of its activities;
- ❖ Pursue the continuous improvement of its performance.

*ODE S.r.l. Italia, in pursuing **continuous improvement**, undertakes to achieve the above stated goals through the following listed actions and principles:*

- Identification of feasible and measurable objectives, verification of their achievement and implementation of necessary corrections and integrations;
- Engagement, sensitization and training of personnel, to raise awareness of the effects of conduct regarding issues relating to the environment and safety;
- Implementation of every effort in organizational, operational and technological terms to prevent water, air and soil pollution;
- Minimization of the consumption of energy, water and raw materials and of the production of waste, favour where possible recovery;
- Promotion of adequate safety conduct by suppliers;
- Assessment and the implementation of measures regarding accident prevention, occupational diseases, hygiene and safety in the workplace, fire, direct and indirect environmental and safety impacts and emergency management;
- Guaranteeing that this document is available to the public.

Guiding Principles of the Safety and Environment Policy

- Accidents and injuries can be predicted and avoided.
- The safety and the protection of the environment are a responsibility of all the ODE hierarchical structure.
 1. The members of the hierarchical structure enforce EHS' procedures and instructions; the members must analyze every accident or possible accident and injury;
 2. The members of the hierarchical structure are committed to monitor and continually improve all the activities to help protecting the environment and preventing/reducing any form of pollution;
 3. EHS' audits and inspections are a source of improvement.
- You are responsible for your safety and for the protection of the environment.
- You are to stop a job or to refuse it if it is dangerous, if it cannot be done in safety, or if it can compromise the environment.
- Employees must immediately report any accident, even if negligible.
- All incidents must be analyzed in order to define preventive and corrective actions.
- All the efforts done to ensure the safety and the protections of the Environmental will lead to results.
- The Managers must be 100% committed to Safety and Environment:
 1. They set high goals aimed at continuous improvement.
 2. They form and empower all the people they work with.
- I Dirigenti devono essere impegnati al 100% per la Sicurezza e l'Ambiente.
 1. Fissano obiettivi elevati volti al miglioramento continuo.
 2. Formano e Responsabilizzano tutte le persone con cui lavorano.
