

Colico, 08/02/2022

OBJECT: Declaration according to art. 33 of Regulation (EC) n.1907/2006 of the European Parliament and of the Council concerning the registration, evaluation, authorization and restriction of chemicals (REACH).

In reference to the EU Regulation 1907/2006, ODE declares that products supplied are classified as “Articles” (art. 3.3 of the Regulation) and, thus, are not subject to registration in conformity with art.6 of the Regulation.

On 27.06.2018 metallic Lead (CAS no 7439-92-1 (1)/EC no 231-100-4) has been added to the “Candidate List” by the European Chemicals Agency (ECHA) requiring, to the producers along the supply chain, the declaration of the substance in articles.

ODE fully complies with the requirements of art. 33 declaring that articles can contain components made with alloys (steel or brass) with lead concentration over 0.1% (p/p).

With reference to products designed for food contact or drinking water, in case of presence of components with lead content higher than 0.1%, ODE guarantees that the contact area of these products has a specific migration in accordance with the European Regulation 1935/2004, verified by ODE with accredited laboratories.

It is ODE priority to inform you promptly, if necessary, in case of changes to Regulation. Should you require additional clarification please do not hesitate to contact ODE Customer Service or send the request to: sales@ode.it.
